Northeastern CS5600 Rockstar Programmer

This certificate is awarded to

Karan Sunil Joisher

in recognition of the excellent performance in the Labs of CS5600 Spring 2023.

Northeastern CS5600 is a computer system course that teaches students how to think from the prospective of a system developer and give students tools to address system related problems. There are in total five Labs, each of which covers a critical aspect of computer systems, including C language, Shell, Concurrent Key-Value Store, Virtual Memory, and File Systems. The labs can be found here: https://naizhengtan.github.io/23spring/labs/.
